

Technical Code DVS 2216-7

Ultrasonic joining of moulded parts and semi-finished products of thermoplastic polymers in large-scale production – Ultrasonic tool/fixture/anvil

Technical Committee of the DVS

Working Group W 4 "Joining Plastic"

Subgroup W 4.1d "Ultrasonic welding"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document.

Content:

1.	Range of validity	3
2.	Function of fixture.....	
3.	Design principles	4
3.1.	Material selection	4
3.2.	Absorption of welding forces	6
3.3.	Avoiding acoustic influences	6
3.4.	Weld support and minimum contact surface	6
3.5.	Joining part centring	9
3.6.	Ergonomics	11
3.7.	Conical joining parts	12
3.8.	Hold-down devices	12
4.	Classification of fixtures	13
5.	Test fixtures.....	14
5.1.	Fillers, moulding compounds	14
5.2.	3D-printed fixtures.....	16
5.3.	Pin module	16
6.	Sonotrodes as fixtures	17
7.	Fixtures on transport systems and rotary indexing tables.....	19
8.	Welding and cutting of flat and flexible materials	24
8.1.	Anvils and anvil rollers	24
8.2.	Roller seam and roller sonotrodes	27
8.3.	Welding and cutting of non-woven materials	28
9.	Fixtures in robot systems	28
