Vibration welding of plastic components – Complex snap-fit systems

DVS, Technical Committee, Working Group "Joining of Plastics"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration as an important source of information is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document.

Voransicht des Regelmärkes

Content:

- 1. Scope**
- 2. Process description**
- 3. Design and operating principle of vibration welding machines**
 - 3.1. Machine types
 - 3.2. Requirements for vibration welding machines
 - 3.3. Individual components
 - 3.3.1. Drive systems
- 4. Machine parameters and process variables**
 - 4.1. Frequency f (Hz), amplitude a (mm)
 - 4.2. Welding pressure p_s (N/mm²)
 - 4.3. Welding time t_s (s)
 - 4.4. Welding penetration s_s (mm) and holding penetration s_H (mm)
 - 4.5. Holding pressure p_H (N/mm²) and holding time t_H (s)
 - 4.6. Temperature in the joining zone
- 5. Welding behaviour of plastics**
 - 5.1. General
 - 5.2. Welding of plastics of the same sort and same type
 - 5.3. Welding of plastics of the same sort but of different type
 - 5.4. Welding of different sorts of plastic
 - 5.5. Joining of plastics with dissimilar materials
 - 5.6. Admixtures: filling and reinforcing materials
 - 5.7. Additives
 - 5.8. Water absorption
 - 5.9. Influence of recycled materials
- 6. Quality requirements for parts to be joined**
- 7. Design of the moulded parts**
 - 7.1. General requirements for the moulded part
 - 7.2. Weld seam design
 - 7.3. Examples of joining zone geometries
 - 7.3.1. Simple butt weld
 - 7.3.2. Butt weld concealed on one side
 - 7.3.3. Butt weld concealed on both sides
 - 7.4. Measures for reliable transmission of the amplitude
 - 7.5. Centring aids
- 8. Holding tools**
- 9. Weld line formation**
 - 9.1. Abrasion and fuzzing
 - 9.2. Combined vibration welding with pre-heating to minimise abrasion and fuzzing.
- 10. Quality assurance measures**
- 11. References**
 - 11.1. Regulations
 - 11.2. Bibliography
