

Technical Code DVS 2228

Infrared welding of thermoplastics in large-scale production

Technical Committee of the DVS

Working Group W 4 “Joining Plastics”

Subgroup W 4.13 “Infrared Welding”

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – German Welding Society and those participating in the drawing up of the document.

Inhalt

1.	Range	3
2.	Process description.....	
3.	Heating of plastics using infrared radiation	5
3.1.	Basics of infrared radiation	5
3.2.	Radiation sources: Temperature radiators	5
3.3.	Wavelength ranges	6
4.	Material influences.....	7
4.1.	Optical material properties	7
4.2.	Thermal material properties	8
4.3.	Rheological material properties	9
5.	Machine technology	9
5.1.	Types and designs	9
5.2.	Drives	10
5.3.	Extraction systems	10
6.	Tool technology.....	11
6.1.	Mounting tools.....	11
6.2.	Radiator assembly	11
7.	Structural design of the joining parts	13
7.1.	Joining zone geometries	13
7.2.	Butt joint basic shapes	13
7.3.	Joining zones with concealed weld seam	15
7.4.	Special shapes (examples).....	16
8.	Welding conditions	16
9.	Quality	18
10.	Safety regulations, information on standards and Technical Codes.....	18
11.	Publications.....	19
11.1.	Regulations	19
11.2.	Literature.....	20
12.	Sample applications	21
