

## Technical Code DVS 2205-5

# Calculation of containers and apparatus made of thermoplastics – rectangular containers

Technical Committee of the DVS

Working Group W 4 “Joining Plastics”

Subgroup W 4 3b „Structural Design - Apparatus Engineering“

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – German Welding Society and those participating in the drawing up of the document.

**Content**

**1. Areas of validity and application ..... 3**

**2. Abbreviations for terms and calculation variables..... 3**

**3. Container types ..... 8**

**4. Safety concept ..... 9**

4.1. Characteristic values..... 9

4.2. Stress verification under  $\gamma_F$ -fold load ..... 9

4.3. Verification of panel deformation under characteristic load ..... 10

**5. Impacts ..... 11**

**6. Calculation factors..... 11**

**7. Containers without reinforcements ..... 12**

7.1. Preliminary remarks ..... 12

7.2. Calculation of side walls..... 13

7.3. FEM calculation ..... 13

**8. Containers with reinforced edges ..... 14**

8.1. Preliminary remarks ..... 14

8.2. Calculation of side walls..... 14

8.3. Dimensions of reinforcement profiles..... 15

8.4. FEM calculation ..... 17

**9. Containers with all-around reinforcements ..... 17**

9.1. Preliminary remarks ..... 17

9.2. Calculation of side walls..... 18

9.3. Dimensions of stiffening profiles..... 19

9.4. Cut sizes and deformations of profiles with rigid frame corners ..... 20

9.5. FEM calculation ..... 21

**10. Containers with yoke reinforcement..... 22**

10.1. Preliminary remarks ..... 22

10.2. Calculation of side walls..... 22

10.3. Calculation of container floor ..... 23

10.4. Dimensioning of yoke reinforcement..... 23

10.5. Cut sizes and deformations of yoke reinforcement..... 24

10.6. FEM calculation ..... 29

**11. Cross-ribbed containers ..... 30**

**12. Container covers..... 30**

12.1. Temperatures ..... 31

12.2. Resting container cover (without reinforcement/stiffeners) ..... 31

12.3. Tightly clamped container cover (without reinforcement/stiffener)..... 32

12.4. Stiffened container cover ..... 33

12.5. FEM calculation ..... 36

**13. Requirements for the structural analysis and the report..... 36**

**14. Design details..... 37**

**15. Standard references, literature/standards and guidelines ..... 40**
