

Technical Bulletin DVS 1617

Quality requirements for subcontractors for the welding of railway vehicles and components

Technical Committee of the DVS

Working Group A 7 "Welding in rail vehicle construction"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document

Content:

1.	Purpose	3
2.	Involved parties in subcontracting	3
2.1.	Clients	3
2.2.	Contractors.....	3
2.3.	Subcontractors	3
3.	Proof of conformity from contractors and subcontractors	4
4.	Tasks of the client	5
4.1.	Order specifications	5
4.2.	Inspection and testing of welded joints by the client	5
4.2.1.	Scope of the inspection and testing of welded joints	5
4.2.2.	Documentation and validity of the inspection and testing of welded joint	6
5.	Tasks of the contractor and the subcontractor	6
5.1.	Contract review	6
5.2.	Design review.....	6
5.3.	Production	6
5.3.1.	Operational equipment.....	6
5.3.2.	Preparation for welding production	7
5.3.3.	Welding personnel	7
5.3.4.	Welding production	7
5.4.	Quality assurance	8
5.4.1.	Test facilities, inspection personnel, tests & inspections	8
5.4.2.	Component test, initial sample test, acceptance test.....	8
5.4.3.	Documentation	8
6.	Changes, deviations	8
7.	Application of standards and guidelines	8
8.	References	9
9.	Appendix A – Duties of the welding coordinator	10
10.	Appendix B – Operational equipment to DIN EN 15085-2	13
