

Technical Bulletin DVS 1620

Inspection and testing of welded joints in rail-vehicle construction

Technical Committee of the DVS

Working Group A 7 "Welding in rail vehicle construction"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document

Content:

1.	Purpose	3
2.	Inspection and testing of welded joints	3
2.1.	Contractual arrangements.....	3
2.2.	Qualification of personnel for the inspection and testing of welded joints.....	4
2.3.	Non-destructive testing of welded joints.....	4
2.3.1.	Personnel.....	4
2.3.2.	Test instruction.....	4
2.4.	Holding points, reporting points.....	5
2.5.	Test steps.....	5
2.6.	Allocation of inspection and testing of welded joints.....	5
2.7.	Content of inspection and testing of welded joints.....	6
2.7.1.	Inspection of welding design documents.....	6
2.7.2.	Inspections of welding and planning documents before the SOP.....	6
2.7.3.	Inspections before welding.....	7
2.7.4.	Inspections during welding.....	7
2.7.5.	Inspections after welding.....	7
2.7.6.	Initial sample test.....	7
3.	Validity of the inspection and testing of welded joints	9
3.1.	Welding design review.....	9
3.1.1.	Design modifications.....	9
3.1.2.	Rebuilding.....	9
3.1.3.	Conversion.....	9
3.1.4.	Repair.....	9
3.2.	Review of welding and planning documents.....	9
3.2.1.	Interruption of welding production and rebanding.....	9
3.2.2.	Relocation of production.....	10
3.2.3.	Conversion and repair.....	10
3.3.	Initial sample test.....	10
4.	Subcontracting	10
5.	Documentation	11
5.1.	Documentation stipulations.....	11
5.2.	Approval, change service.....	12
6.	References	12
7.	Appendix	13
