

Technical Code DVS 2205-2 Supplement 11

Calculation of tanks and apparatus made of thermoplastics – Vertical round, nonpressurised tanks – tanks without tilt securement in earthquake area

Technical Committee of the DVS

Working Group W 4 “Joining Practices”

Subgroup W 4 3b „Structural Design - Apparatus Engineering“

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the DVS – Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document.

Content:

1.	Introduction	3
2.	Calculation variables	6
3.	Decision criteria	6
4.	Rating strategy	6
5.	Axial stress in the cylinder due to earthquakes.....	6
5.1.	Axial compressive diaphragm force	7
5.2.	Axial tensile diaphragm force	8
6.	Strength test on the traction side.....	8
6.1.	Base	8
6.2.	Cylinder	9
6.3.	Connecting piece in cylinder	9
7.	Tests on the pressure side.....	10
7.1.	Axial stability	10
7.2.	Axial stability next to cylinder connecting piece	10
8.	Definitive wall thicknesses.....	11
9.	Anchoring	11
9.1.	Tank in collecting container.....	11
9.2.	Tank in fixed-position collection device.....	11
10.	References.....	11
