

## **Technical Code DVS 2205-2 Supplement 3**

### **Calculation of tanks and apparatus made of thermoplastics – Vertical round, nonpressurised tanks – Flat roofs**

DVS, Technical Committee, Working Group "Joining of Plastics"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration as an important source of information is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document.

**Inhalt:**

1. **Scope**
2. **Calculation variables**
3. **Structural design**
4. **Stresses**
5. **Temperature**
6. **Stability analyses**
  - 6.1. Unstiffened roof
  - 6.2. Roof with stiffeners
    - 6.2.1. Strength analysis of the roof panel perpendicular to the stiffeners
    - 6.2.2. Analyses along the stiffeners
7. **Accessibility**
8. **Appendix**
  - 8.1. Explanations
  - 8.2. References
  - 8.3. Mathematical Young's moduli for stability calculation
  - 8.4. Structural details
