Technical Code DVS 2207-1

Welding of thermoplastics – Heated element welding of pipes, piping parts and panels made out of polyethylene

DVS, Technical Committee, Working Group "Joining of Plastics"

This publication has been drawn up by a group of experienced specialists working in an honorary capacity and its consideration as an important source of information is recommended. The user should always check to what extent the contents are applicable to his particular case and whether the version on hand is still valid. No liability can be accepted by the Deutscher Verband für Schweißen und verwandte Verfahren e.V., and those participating in the drawing up of the document.

Inhalt:

- 1. Scope**
- 2. General requirements**
- 3. Measures prior to welding**
 - 3.1. Welding requirements
 - 3.2. Cleaning
 - 3.2.1. Cleaning agent
 - 3.2.2. Cleaning the heating elements
 - 3.2.3. Cleaning the joint surfaces
- 4. Heated plate welding**
 - 4.1. Heated plate welding of pipes, piping parts, fittings and panels
 - 4.1.1. Process description
 - 4.1.2. Preparing for welding
 - 4.1.3. Performing the welding
 - 4.2. Heated plate welding of saddle-type connections
 - 4.2.1. Process description
 - 4.2.2. Preparing for welding
 - 4.2.3. Performing the welding
- 5. Sleeve welding with incorporated electric heating element**
 - 5.1. Process description
 - 5.2. Welding equipment
 - 5.3. Preparing for welding
 - 5.4. Performing the welding
- 6. Heated element sleeve welding**
 - 6.1. Process description
 - 6.2. Welding jigs
 - 6.3. Preparing for welding
 - 6.4. Performing the welding
- 7. Checking the welded joints**
- 8. References**
- 9. Explanation**

Appendix: Processing Instructions (summaries)
Welding protocols
